
WP1 measurements
hillslope surface
Layer 1: PC quartzite and minor sillimanite gneiss with high intensity fracture networks.
Layer 2: Breccia and gouge.
Layer 3: PC quartzite and minor sillimanite gneiss with pyrite veins.
Layer 4: Tertiary silicified porphyry with feldspar phenocrysts and pyrite veins.
91 m
116 m
Interface of oxidized-unoxidized zone
Water table
$k_1 = 2\times10^{-13}$ m²
$k_2 = 7\times10^{-14}$ m²
$k_3 = 2\times10^{-14}$ m²
$k_4 = 5\times10^{-15}$ m²
Depth of groundwater circulation
WP2 measurement
30 m
